About us

AGS Sp. z o.o. deals with the design and production of innovative and unparalleled on the market mounting systems for ventilated facades. The proposed passive solutions are distinguished by durability and, above all, safety, which is confirmed by numerous certificates and tests carried out in leading research units.

All fastening systems meet the fire protection requirements, durability standards, taking into account the corrosive category of the environment and the guidelines of Technical Conditions to be met by buildings and their location in terms of thermal insulation of walls, taking into account thermal bridges.

The AGS company is the only company on the Polish market that offers consoles with embossing on the feet, increasing the load capacity of the section by even several dozen percent, and with holes, which effectively reduces the thermal conductivity of the entire connector.

The AGS team consists of experienced specialists focused on continuous development and implementation of innovative and unprecedented research and development (R&D) projects.

AGS has its own machine park, consisting of five specialized numerically controlled lines, ensuring precise management of the production process and a guarantee of the highest quality of the manufactured product.

The automation of the production process ensures a short time of order fulfillment, while allowing the execution of special projects, tailored to the client's expectations.

By working with AGS, you will receive appropriate support at the very beginning of the project. On the basis of the presented documentation, the AGS Technical Team will propose the most optimal solution, taking into account legal, technical and material requirements.

The dynamic development of the company as well as the constant expansion and improvement of the product offer contributed to obtaining the right to protect intellectual property.

Passive system - basic

Passive system for riveted plate

Passive system for glued board

Passive system for concrete - horizontal grate

Passive system for undercut anchors

Passive system for wooden substructures

Passive system - hanger

Passive system - suspended, glued

Internal cladding system - glued

Passive system - joining several boards

Inter-story mounting system

Passive system - horizontal arrangement

System BIPV 01

System BIPV 02

System BIPV 03

Passive system for concrete cladding

AGS HI+ passive consoles (made of GD 350 steel and stainless consoles) are innovative construction connectors that significantly reduce the conduction of cold into the building.

Characterized by:

- very low heat conduction coefficient,
- eliminating point thermal bridges.

AGS Brackets adjustment options

Internal Bracket

For walls with no insulation required

MAGNELIS INTERNAL CLADDING BRACKETS		
Name	Dim A [mm]	Dim B [mm]
Double Bracket AGS HI+ Z8 55-160-CORRIER	55	160
Single Bracket AGS HI+ Z7 55-70-SLIDING	55	70

Double Bracket

MAGNELIS DOUBLE BRACKETS		
Name	Dim A [mm]	Dim B [mm]
Double Bracket AGS HI+ Z8 120-130-CORRIER	120	130
Double Bracket AGS HI+ Z8 120-160-CORRIER	120	160
